DETAILED ACTION

Restriction Requirement

2. Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Ph.D., Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-6 and 8, drawn to a method of treating or preventing ulcerative colitis comprising administering a recombinant protein; classified in Class 424, subclass 184.1.

II. Claims 1-2, and 4-7, drawn to a method of treating or preventing ulcerative colitis comprising administering phorbol-12-myristate-13-acetate; classified in Class 514, subclass 510.

III. Claims 1-2, and 4-7, drawn to a method of treating or preventing ulcerative colitis comprising administering monensin; classified in Class 514, subclass 2.

IV. Claims 1-2, and 4-7, drawn to a method of treating or preventing ulcerative colitis comprising administering methylamine; classified in Class 514, subclass 610.

V. Claims 9-11, drawn to a method of screening drugs, classified in Class 435, subclass 7.92.

VI. Claims 12-15, drawn to a diagnostic method for detecting diseases associated with an auto-antigen complex, classified in Class 435, subclass 7.1.

Art Unit: 1644

4. Groups I-VI are different methods. The inventions as grouped in Groups I-VI are distinct, each from the other, because they represent different inventive endeavors as one does not suggest the other; therefore, each method is patentably distinct.

Claims I-IV recite compounds that are recombinant proteins, phorbol-12-myristate-13-acetate, monensin, or methylamine respectively. Recombinant proteins, phorbol-12-myristate-13-acetate, monensin, or methylamine differ with respect to their structures; one of ordinary skill in the art would not envision one in view of the other. In addition, they differ in mode of action; therefore, they have been set forth as groups irrespective of the format of the claims.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Species Election

6. Applicant is further required under 35 USC 121 (1) to elect a single disclosed species to which the claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

If Group I is elected, applicant is required to elect a specific method of treating or preventing ulcerative colitis comprising administering a specific recombinant protein, such as a protein having a functional fragment of hTM, disclosed in the specification on page 4, lines 1-11.

These species are distinct because the methods treating or preventing differ with respect to the specific recombinant protein administered; thus each specific method employing a specific recombinant protein represents patentably distinct subject matter.

7. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Art Unit: 1644

8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Megan Jamroz whose telephone number is (703) 308-8365. The examiner can normally be reached Monday through Friday from 8:00 AM to 4:30 PM. A message may be left on the examiner's voice mail service.
